Aim of the Course

Dear colleagues,

the new course format offers ESD operators to improve the skill level for accurate endoscopic indication (i.e. prediction of pT category) and performance of ESD on lesions in colorectum, stomach, esophagogastric junction and esophagus – under direct tutorship of national and international experts.

The aim is to promote the professional level of ESD for curative intention.

Dear Colleagues,

we invite you to improve your skills in endoscopic analysis, therapeutic decision making and endoscopic resection of early neoplasias of the gastrointestinal tract:

- Accurate endoscopic assessment of surface and microvascular structure for prediction of pT category
- Indications for endoscopic versus minimal invasive surgical resection techniques
- Techniques for endoscopic en-bloc resection

This meeting focuses on aspects to optimize endoscopic analysis and staging of early neoplasias as well as strategies and performance of minimally invasive resections – to enhance proficiency in this new field.

We hope to stimulate your interest and welcome you to the Endo Skill Update 2022.
